PROFESSIONAL EXPERIENCE

Peloton, New York, NY

Senior QA Engineer

Feb 2023 - Jul 2023

- QA Lead that managed three contractors on a product team with Android, API and Web platforms
- Trained and supported team members to join on-call rotations and execute weekly releases
- Created a process to leverage existing Appium tests to reduce manual testing of team release candidates
- Contributed to an Espresso test suite to help increase automated coverage across wider release testing

QA Engineer

Jul 2020 - Feb 2023

- Managed weekly releases for Peloton Bike & Tread app and background applications
- Coordinated with teams in NYC/Taiwan to create a release schedule, plan release testing efforts, triage incoming bug reports, and advocated for hotfixes/rollbacks or blocking the release entirely
- Created frameworks and workflows for project documentation on our QA team to better share information internally and externally, resulting in streamlined weekly meetings Worked with Dev and Infrastructure teams to create Jenkins jobs to automate/expedite tasks, including creation of weekly slack channels, trigger builds automatically and sign apks
- Automated weekly QA reports by leveraging Python and external APIs to generate CSVs for release notes

Orgspace.io, Remote

QA Consultant - Freelance

Sept 2022 - Jul 2023

- Freelance role for small startup, created automation framework from scratch using Cypress
- Wrote Github Actions workflow to run on a schedule and publish the results in Slack

SeatGeek, New York, NY

Jan 2018 - Apr 2020

QA Engineer

- Established QA process on mobile team as first QA hire at the company
- Implemented and maintained test case management tool, wrote 200+ test cases to be executed during iOS and Android app release testing and coordinated with 3rd party testing company
- Wrote automated regression tests for Android and iOS apps with XCUITest and Appium/Robot Framework
- Created automated tests for web team to monitor core flows in production across browsers

Meetup, New York, NY

Senior QA Engineer

Jan 2017 - Dec 2017

QA Engineer

Dec 2013 - Jan 2017

- Wrote automated Selenium tests using Robot Framework to support move to CD and replatforming efforts
- Supported the transition from data centers servers to AWS cloud
- Joined part of small group that did Production deploys
- Worked closely with Product and Engineering as QA lead across many teams on desktop, mobile web and mobile apps platforms

Community Specialist

Dec 2012 - Dec 2013

- Member of the customer support team, managed team members and reported defects
